Notes:

- You may use a meta-flight search engine depending of your country to find an overview of possible flights, eg. www.opodo.de, www.skyscanner.pl.
- Taking a bike on an airplane can cost up to 50 EUR for such "sports luggage". Read carefully what the airline requires. Some want the bike just to be wrapped a little and handlebars turned. But some, for example Ryanair*, has strong conditions: bicycles must be contained in a protective box or bag in order to be accepted for travel.
- When you join the BC tour and arrive with such carton or bag, we try to carry it on our tour van for flying home, but depending on remaining space. Don't worry: If necessary, you can find such carton box in bike shops of the bigger cities we pass.

* Note also that any sporting and musical item weighing over the 20 kg allowance will be charged for the excess at the applicable excess baggage rate per kilo except for bikes which have a weight limit of 30 kg. This means that it is possible, at least on Ryanair, to load your bike bag or box up to 30 kg without incurring any extra baggage charges. You may, however, be asked if it is just a bicycle.
